# INFORMATION SECURITY POLICY

OF B+N MAGYARORSZÁG KFT.

For B+N Magyarország Kft., information represents a key value. Ensuring the confidentiality, integrity, and availability of information is a fundamental requirement for lawful, reliable, and sustainable operations, as well as for maintaining partner and business trust.

We consider information security to be an organizationwide responsibility that extends to management, employees, and all partners who, in cooperation with B+N Magyarország Kft., have access to information.

To this end, B+N Magyarország Kft. operates an information security management system that ensures the protection of information assets, as well as the identification, assessment, and treatment of information security risks, and the implementation of appropriate protective measures.

Information security risks are regularly assessed, considering internal and external threats, vulnerabilities, and potential impacts on business operations. Proportionate preventive and protective measures are defined and implemented to manage these risks.

We pay special attention to the protection of personal data, business and contractual information, financial data, as well as IT systems. Access to information is regulated based on the 'need to know and justified basis' principle to ensure that individuals have access only to the information necessary for the performance of their duties.

B+N Magyarország Kft. is committed to complying with legal, contractual, and other information security requirements, as well as to the continuous improvement of its information security performance.

We support the strengthening of information security awareness through training and internal communication, as we believe that one of the most important pillars of information protection is responsible and conscious employee behaviour.

We expect our employees and contracted partners to comply with information security requirements and to promptly report any risks, incidents, or suspicions related to information security to the designated organizational role.

Our information security activities are carried out in compliance with applicable legal requirements, as well as the principles and requirements of the MSZ ISO/IEC 27001:2023 standard.

This Information Security Policy is regularly reviewed, and its contents are communicated to employees. Familiarity with and compliance with the provisions of this policy are mandatory for all employees of B+N Magyarország Kft.
